HIGH VISIBILITY FASTENER DISC INSTALLATION - SCOTTISH WATER

High visibility fastener discs have been installed at major Scottish Water sites, replacing the original fastener discs. Please view the before and after images below using GRATFG-HV discs.

BEFORE

AFTER

GRATFG-HV
GRATING FASTENER DISC
GALVANISED, POWDER COATED

Traditional fastener discs are difficult to see once fitted and can cause a trip hazard. Significant problems have also occurred when discs have been removed but not replaced, leading to the movement of grating panels.

GRATFG-HV fastener discs are galvanised and powder coated RAL 1016 for high visibility. It is immediately obvious if a disc has been removed or needs tightening.

Item code	Shank length	Head diameter	Grid thickness
GRATF25G-HV	22.8mm	52mm	25mm
GRATF30G-HV	27.8mm	52mm	30mm
GRATF40G-HV	37.8mm	52mm	40mm

For fastening grating with thicknesses of 25mm to 40mm as standard, and deeper when used in conjunction with the GRATEX extension.

GRATEX extension
overall length 30mm
effective extension length 20mm
